

RESELO RUBBER PERFORMANCE OUTSOLE EU VALUE CHAIN

From forestry side-stream to sustainable rubber; **these die-cut test sheets can be used as outsoles for brands with supply chains in the EU who need extraordinary durability, grip and resilience in demanding conditions.**

Order our test sheets for outsoles incorporating Reselo Rubber, a patented technology that replace petroleum rubber ingredients and increase performance. Our *PERFORMANCE* outsoles contain **25% (weight percent) renewable materials** and are already on the market. The solution is **ready for implementation**, as compound or readymade outsoles, in your existing production chains in the EU.

Our innovative approach, third-party approved sustainability claims, and ability improve performance open a unique opportunity in the rubber outsole space. We would love for you to tap into it!

These outsole sheets were developed for and implemented in Skråmträsk's shoes, that are already on the market!

DATA SHEET PERFORMANCE OUTSOLES

Abrasion resistance: 129 mm³

Hardness: 72 +/- 2 Shore A

Density: 1.1 mg/mm³

Better tear strength (16 N/mm)

Comfortable due to good damping properties

Very good slip resistance on dry and wet surfaces

- ✓ PLUG & PLAY TECHNOLOGY
- ✓ UPCYCLED FORESTRY WASTE
- ✓ INNOVATION CHAMPIONS
- ✓ DATA-BACKED SUSTAINABILITY CLAIMS

We enable positive impact through material innovation, close collaboration and strong partnerships. **Join us on the journey!**
